

WORLD CAPABLE TRAVEL - TOTAL OFF-ROAD ABILITY

Global Expedition Vehicles' "Global Traveler" on a 1988 Mercedes 1017, creates the perfect World Travel vehicle.

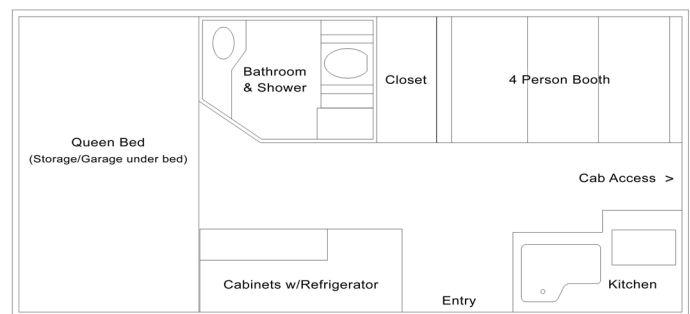

This Global Traveler is generously equipped for safe, comfortable travel, yet has many upgraded options that will suit most travel needs. So whether your plans are for Africa, South America or perhaps Asia, count on this Mercedes chassis and GXV's Global Traveler Expedition Body to get you there and back safely and comfortably.

Our 4wd camper can burn any mix of diesel fuel including High or Low Sulfur diesel, and/or bio-diesel found in the world, making this Expedition Vehicle a true go-everywhere vehicle.

All GXV off-road RV's are built with marine grade materials and components, which are superior to the usual 4x4 motor homes standards.

Global Expedition Vehicles are much more than an extreme off-road RV. Whether you have a journey or destination in mind, our vehicles are designed and built for self-reliant travel to remote parts of the globe. With our Expedition Vehicles, count on engineering that will withstand treacherous off-road routes and extreme weather conditions.

Global Traveler is built to be totally self-contained and able to withstand any terrain you may encounter. This 4wd camper will provide overlanders comfort and security when exploring the world. This expedition RV was designed to supply enough fuel, energy and water for self reliant travel for extended distances and durations.
